

Omega Natchiq Construction Division

Construction Services

Our facility provides complete turnkey fabrication services and new construction for energy, refining, chemical, utility and manufacturing industries including module construction, production platforms, pipe and structural fabrication, and Subsea fabrication. We have successfully completed multi-million dollar domestic and international projects meeting rigorous standards. The Port of Iberia location offers convenient waterway access to the Gulf of Mexico and Gulf Coast, and for domestic and international deliveries.

Other construction services include:

- Subsea Manifold, PLET, PLEM, Jumper and other component Fabrication
- Module Fabrication
- Pipe Rack Construction
- Interconnected Piping Fabrication
- Structural Fabrication
- MCC Buildings
- Production Platforms
- Generator Buildings
- Compressor Packages
- ASME Vessels – National Board Certified with R and U Stamps
- Product Handling Systems

New 2011 Fabrication Facility

This facility consists of a new shop building with state-of-the-art computerized CNC type beam fabrication equipment.

This new equipment is designed to process beams, channels, rectangular/square tubes, angles and other structural shapes.

It utilizes a six axis Robotic Plasma Cutting System and cuts material to length, copes, compound miters, bevels, cuts weld access & bolt holes and etches piece marks, heat numbers and layout lines for weldments.

New in 2009, 120'X170' Material Preparation Shop:

Computerized CNC Pipe Coping/Cutting Machine up to 48" pipe capacity. Computerized CNC Plate Cutting equipment, cuts any thickness of plate up to 10'X40' sheets, 400 amp plasma or oxy-fuel, with 5 axis bevel head.

ASME/Process Facilities Services

Certified as an American Society of Mechanical Engineers Boiler and Pressure Vessel Code manufacturing facility, we have the capability to design, fabricate and certify all new vessels to the ASME Code, Division 1; Section VIII. We maintain "R" and "U" Stamps and are approved by the National Board for pressure vessel alterations and registrations.

Omega Natchiq has been certified for ASME Code fabrication since 1994 and has successfully completed hundreds of ASME Code certified projects. We are authorized to make national board code repairs and have expanded our capabilities to include tank fabrication and vessels of larger diameters and wall thicknesses. We also specialize in offshore/onshore vessel repairs and alterations and have the ability to coordinate total confined space operations with certified in-house personnel. Our vessel capabilities include:

- Vessels up to 14' in diameter, with special rigging we have completed vessels up to 20' in diameter.
- Vessels up to 75' in length.
- Vessels up to 100 tons in weight.
- Maximum sized vessels require special rigging to fabricate and handle.
- Vessel Materials range from carbon steel to stainless steel and other alloys.

Offshore/Offsite Construction Services

We are recognized as one of the best in the business for providing superior offshore/offsite construction and maintenance services for the complete cycle of a project. Our experienced and trained personnel work safely and efficiently to provide a comprehensive package of services, including:

- Installations
- Deck Hook-up
- Commissioning and Decommissioning
- ASME Vessel Repair
- Platform and Production Upgrades/Refurbishments
- Compressor Installations
- Drilling Rig Upgrades
- Maintenance and Construction Crews
- Plant Maintenance, Upgrades, and Turnarounds

Operations & Maintenance Services

The Operations and Maintenance group understands work demands in the field and specializes in preventative maintenance. Cross-trained personnel have expertise in electrical, mechanical, and welding services and are able to provide immediate support on platforms or in plant environments. This group provides:

- Experienced, qualified, trained, and safety conscious personnel for onshore, offshore and offsite locations.
- Certified personnel for compliance requirements.
- Initial hook-up & start up teams.
- I & E technicians, maintenance crews, production operators and other personnel as needed for specific project needs or on a rotational schedule basis.
- Temporary A, B, and C operators, welders, fitters, riggers, roustabouts, crane operators, fire & gas technicians, automation & controls technicians, HSE technicians, superintendents, foremen, clerks and other personnel.
