

Return to Work Plan

The 3900 C Street building is open to employees on a limited basis. New practices and procedures have been enacted in compliance with state and local mandates, which are contained in the ASRC COVID-19 Mitigation Plan. AES will consider allowing building access to employees who can better perform their jobs in the office. Only pre-approved employees may access the building at this time.

Building Access Request

If you need access, please discuss the request with your manager. Your manager will then discuss your request with the Department Leader, if applicable. If approved, designated personnel will send a request to ASRC Human Resources, which is managing the process on behalf of the entire building. The COVID-19 Mitigation Plan discusses the process and procedures that must be strictly adhered to by anyone accessing the building.

Reopen Alaska Responsibly Plan

Visit the state's website for guidance documents about fishing charters, lodges, camping, and intrastate travel.
